## DETAILED ACTION

**After further consideration the finality of the final office action is withdrawn.**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Depends from a canceled claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Maruko et al (6,217,463). Maruko discloses a golf ball comprising a plurality of linear extending ridges on a surface of the golf ball, which are separate from each other. The ridges are grouped to form polygonal cavities (fig. 2). The ridges are separate from each other and form gaps between the ridges.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 12, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogg (2002/0032083). Claims 8 and 12, Ogg discloses a golf ball comprising a plurality of linear extending lands, which are separate from each other. The lands have a length from 3.18 to 15 mm and a triangular apex (col. 5). Claim 17, the total number of lands is from 200 to 400. One of ordinary skill in the art would vary the ranges for optimal flight performance.

Claims 2, 9, 12, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maruko et al (6,217,463). Claim 12, Maruko discloses a golf ball comprising a plurality of linear extending ridges on a surface of the golf ball, which are separate from each other. The length of the ridges is from 3 to 15 mm. Claim 13, the ridges have different lengths (fig. 5). Claims 9, the top of the ridges have a trapezoidal (square) top. Claim 2, The ridges from a cavity. One of ordinary skill in the art would vary the length of the ridges for optimal performance.

***Allowable Subject Matter***

Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 14-16 are allowed.

***Conclusion***
